

Aerator Accessory Aqua-Jet II[®]

The Aqua-Jet II cover assembly consists of fiberglass cover segments, a discharge cover reinforcement kit, and all the necessary fasteners, and diffusion head bracket for installation. The Aqua-Jet II eliminates misting and virtually all cooling effects.

The covers do require some special consideration as they:

- Reduce oxygen transfer efficiency by approximately 30%
- Require special mooring considerations for install.
- Cannot be used with Low-Trajectory Diffuser (LTD) or Arctic-Pak.

Unit Size	Part Number	Part Number Pivot Moored Units
3-7.5	2961073	2961187
10-15	2961074	2961565
20-25	2961075	2961282
30-40	2961144	2961539
