

Product SPOTLIGHT

Lubrication Products for Water & Wastewater Equipment

Chevron® Oil and Greases

- Wide selection for water and wastewater plant use

Chevron oil and greases are manufactured for a wide range of applications. The Chevron brand has been around since the 1930s. From gear oil to hydraulic oil, and general greases to motor bearing greases, the Chevron name implies premium performance and protection.

Shipping: All 55-gallon and 120-lb drums, and quantities of 6+ of the 5-gallon and 35-lb pails ship motor freight.

Oil

Chevron Meropa® XL Gear Oil

Chevron Meropa XL premium high-performance gear oil offers long life, corrosion protection and wear protection. It has resistance to oil degradation at high temperatures, resulting in extended oil life and long drain intervals. It provides micropitting resistance for reduced maintenance and increased system uptime. Designed for use in industrial gear systems, where extreme load and shock load protection is required.

Cylinder Oil for Gear Drives

Chevron Cylinder Oil W is an emulsifying cylinder oil. This type of oil provides excellent metal wetting, which assures an effective lubricant film will form on cylinder walls and pistons of steam pumps and engines. It also has the properties that are needed for lubricating the sliding worm gear surfaces in worm drive gears. The combination of oil emulsibility and metal wetting characteristics results in lower oil consumption rates and improved oil lubricity in the presence of wet steam or water.

GST Compressor Oil

Chevron GST® Oil is designed for the critical demands of air compressors, and meets or exceeds specifications of OEMs such as General Electric, Asea Brown Boveri, Siemens Westinghouse, Solar and Allis Chalmers. This oil yields outstanding thermal and oxidation stability over long periods of time. It gives excellent rust and corrosion protection, air release, foam suppression and water separation. This all leads to longer oil service life and increased uptime. GST oil passes both the Fresh Water Corrosion Test and the severe Synthetic Sea Water Test.

R&O Oil for Pumps

Chevron R&O Oil is recommended for use in electric motor bearings, air compressors, high-speed gears, combustion turbine generators and hydraulic systems. These multi-functional lubricants provide the added benefits of long life, rust protection, oxidation inhibition and excellent foam suppression and air release. R&O Oil passes both the Fresh Water Corrosion Test and the severe Synthetic Sea Water Test.
