

Enamel Paints

Rust-Oleum® 5200 System Industrial Choice® Acrylic Enamel

- Apply to clean, rusted or galvanized metals
- Resists fading and chalking 2 to 3 times longer than oil-based enamels
- Water-based formula for easy clean-up

This water-based acrylic enamel outperforms oil-based enamels in corrosion, chemical and weather resistance. It's ideal for water towers, plant buildings, collector shacks, railings, pipe and more. Can be applied to damp surfaces.

Enamel dries fast so you can apply a two-coat system in less than 3 hours. Apply with brush, roller or spray (thin with water only). One gallon covers 150 to 260 square feet. Low VOC, low odor. Sold in one-gallon containers. **Cannot be sold in the South Coast Air Quality Management District.**

Rust-Oleum® High-Performance V7400 System DTM 340 VOC Alkyd Enamel Paint

- Protect indoor and outdoor surfaces from rust and corrosion
- Low VOC (less than 340 g/l)
- Excellent coverage in one coat

Protect metal surfaces from rust and corrosion while also protecting the environment. This low-VOC rust-preventative coating is great for everyday use. Its long-lasting finish provides superior resistance to chipping, cracking and peeling. Not for use on galvanized steel. Sold in one-gallon containers.

Shipping: Ships by ground only.
