

Insecticides

Microbe-Lift BMC Biological Mosquito Control

- Kills developing mosquitoes before they can breed
- Long-lasting alternative to chemicals or pesticides

Standing water is a fertile breeding ground for many varieties of mosquitoes, which lay between 100 to 300 eggs at a time. Microbe-Lift BMC kills developing mosquitoes before they can breed, including those that may transmit West Nile Virus. This biological larvicide works by paralyzing the mosquito larvae digestive tract, causing the larvae to die before they develop into adults.

Microbe-Lift BMC will not disrupt the biological processes associated with wastewater treatment. It is safe in areas that contain aquatic life, fish and plants, as well as areas used by or in contact with humans, animals, horses, livestock, pets, birds or wildlife.

Agency approvals: EPA-registered in 49 states and the District of Columbia. Not for use or sale in New York.

DESCRIPTION	STOCK #	EACH
Microbe-Lift BMC, 1 Gallon	16068	\$
3-Gallon Tank Sprayer w/ Wand	332260	

Dosage Schedule

Apply Microbe-Lift BMC by adding directly into a water source or spraying around ponds and lagoons:

6 drops per 100 gallons every 2 weeks; 5 mL (1 teaspoon) per 2000 gallons every 2 weeks or 48 oz per 100,000 gallons every 4 months.

For spring thaw, add 1 gallon of BMC to 19 gallons of water. Mix that 20 gallons and spray. This is equivalent to 1 teaspoon for every 540 ft².

CIK (Crawling Insect Killer) Insecticide

- Stops crawling insects in their tracks
- Pleasant vanilla scent
- Aerosol features a stream spray pattern

Eliminate crawling insects on contact. This special formulation also offers a long lasting (up to 3 months) residual action to keep bugs from coming back. Effective against ants, centipedes, silverfish, roaches, waterbugs, palmetto bugs, scorpions, spiders and many more. Great in cracks, crevices and other hard-to-reach areas. 20-oz spray can, net wt 14 oz.

Enviro-Midge Killer Insecticide

- VOC-free
- Contains all-natural food-grade ingredients
- Free of asthma-causing substances

Enviro-Midge Killer quickly kills midge flies and filter flies on contact. Use it indoors or out. With its fresh peppermint scent, no one will notice an insecticide has been sprayed. It contains all-natural bio-based food-grade ingredients, and is safe for humans, animals and the environment. Use a trigger-spray bottle or 1-gallon compression sprayer to spray as a mist in areas where the flies swarm to kill them on contact. Spray on facility side walls to provide residual protection.

Enviro-Midge Killer also works on other pests, including ants, beetles, centipedes, cockroaches, crickets, earwigs, fleas, silverfish, spiders, termites, ticks and fruit flies. Spray into cracks where insects are hiding or nesting. Spray it into drains to kill fruit flies. Some resilient insects may require a second treatment.

Note: Overspray can make floor surfaces slippery; use mild detergent and water to remove.
