## Pressure Washing Equipment

### Mi-T-M® Cold Water Pressure Washers

- Powerful units deliver the pressure you need
- Rugged construction—built to last

Use these cold water pressure washers for tough jobs in the plant or out in the field.

**A** **ChoreMaster® electric direct-drive pressure washers** are ideal for use on the go. Their compact design and convenient carrying handle make them easy to transport. Pumps feature a fill port, oil drain, sight glass, rubber isolated frame, and TEFC electric motor with manual reset thermal overload protection.

**Includes:** professional-grade trigger gun, variable high/low pressure nozzle with adjustable spray pattern (0 to 60°), 25' x 3/8" wire-braided non-marking pressure hose, and 35'L power cord with GFCI and NEMA 5-15P 15A plug.

**B** **Work® Pro gas-powered direct-drive pressure washers** are contractors' top choice for the toughest jobs. They feature a heavy-duty frame with a 1"-diameter powder-coated steel tube handle and dual rubber isolators. Pump features a brass manifold, built-in low-pressure detergent injection, in-line water strainer and a thermal relief valve for added pump protection.

**Includes:** professional-grade insulated trigger gun with safety lock-off, 36" lance, 25' x 3/8" wire-braided pressure hose, and quick-connect nozzles (15°, 25° and detergent).

**C** **CWC series gas-powered belt-drive pressure washers** are some of the most powerful cold water pressure washers on the market. Built for continuous use, their 11½-gal rust-resistant polyethylene fuel tank allows up to 8 hours of run time. Washers feature pneumatic mg tires with tubes, locking tire brake, solid steel threaded axles, and a patented powder-coated frame with 1¼" roll cage, handles and lifting hook.

**Includes:** professional-grade insulated trigger gun with safety lock-off, 48" lance with rubber grip, 50' x 3/8" non-marking pressure hose with quick connects and bend restrictors, and quick-connect nozzles (0, 15, 25 and 40°).

**Shipping:** All pressure washers ship motor freight.

### Mi-T-M® Hot Water Pressure Washers

- High-quality construction for long-lasting performance
- Water temperatures up to 150°F (66°C) above ambient

When cold water just won't cut it, use these hot water pressure washers. They feature an energy efficient top-fired heat exchanger for easy maintenance, and a high-quality fuel filter/water separator for a clean fuel supply (use No. 1 or No. 2 diesel or kerosene). Choose from electric or gas-powered units.

**D** **HSE series electric direct drive pressure washers** are an ideal choice for applications requiring more than 20 hours of use per week. They feature a TEFC electric motor with manual thermal overload protection, a reinforced powder-coated steel tube frame with center balancing hook, steel hose reel mounting bracket, electric cord hanger, gun/wand holder, solid steel threaded axles, and pneumatic tires with tubes and locking tire brakes.

**Includes:** professional-grade insulated trigger gun with safety lock-off; 50' x 3/8" steel wire-braided pressure hose with screw connects, swivel and bend restrictors; adjustable pressure insulated dual lance with 15° fixed and detergent nozzles; and 35'L power cord with GFCI and NEMA 5-15P 15A plug.

**E** **HSP series gas-powered direct drive pressure washers** feature a patented Electro-Magnetic Firing System (EMF), eliminating the need for a 12V battery during burner operation. Units feature a reinforced powder-coated steel tube frame, solid steel threaded axles, pneumatic tires with tubes and locking tire brakes, and on/off burner switch.

**Includes:** professional-grade insulated trigger gun with safety lock-off; 3/8" steel wire-braided pressure hose with screw connects (47413 is 40'L, 47415 is 50'L), swivel and bend restrictors; and an adjustable pressure insulated dual lance with 15° fixed and detergent nozzles.

**Shipping:** All pressure washers ship motor freight.
