

Insecticides & Herbicides

NEW!

Zep® Insect Killers

- Eliminate nuisance insects

Dual Action Insect Killer

This dual action insect spray kills on contact and protects for up to three months. It's highly effective against many types of bugs, including ants, bees, beetles, cockroaches, lice, scorpion spiders, and other pests. For use indoors and outdoors.

Instant Knockdown Wasp and Hornet Killer

Get rid of wasps, hornets and yellow jackets quickly and at a safe distance with this professional strength insecticide. The powerful jet spray reaches up to 22 feet to kill the entire nest without risk of stings. Residual action kills wasps and hornets returning to the nest. No harsh fumes. For outdoor use only.

Demise Powdered Insecticide

- Excellent for fire ants
- Works up to 6 months

This powdered insecticide saps the life out of fire ants and other insects by draining them of moisture. Just sprinkle some powder on or around anthills or other areas where bugs are traveling through. As soon as the insects track through it, the active ingredient immediately begins to absorb valuable moisture from their bodies. The powder also clings to their hairs and is carried back to the nesting area, contaminating the rest of the colony. Effective against cockroaches, ants, earwigs, centipedes, scorpions, spiders and many more. Demise is available in convenient puffer bottles for easy application or in economical bulk containers.

Extinct Insecticide

- Works on both crawling and flying insects
- Up to four week residual effect
- Ready to use; no dilution required

Control a wide range of annoying insects with Extinct insecticide. Its active ingredient, Permethrin, offers both contact and residual insect control for up to four weeks after application. Safe indoors and out, this insecticide is effective against mosquitoes, ants, roaches, beetles, fleas, flies, spiders, silverfish, gnats and many more crawling and flying insects.

Spectracide® Vegetation Killer

- Keeps the ground clear for up to a year
- Easily applied with sprinkler can or tank sprayer

Kill weeds and stop new growth for up to a year. Eliminate unwanted vegetation from driveways, walkways, patios, fence rows and any other areas where you don't want growth. Vegetation Killer is easy to apply using a sprinkling can or a tank sprayer.

Roundup® Weed & Grass Killer

- Kills the toughest weeds and grasses
- Won't spread to other vegetation through soil

Kills the toughest weeds and grasses. Absorbs through the leaf and stem only so killing power won't spread to non-target plants through the soil. Concentrated formula dilutes to cover big jobs.

Triple Threat Selective Herbicide

- Kills woody brush and up to 140 different types of broadleaf weeds
- Choose from easy-to-use foaming aerosol or concentrated liquid

Triple Threat selective herbicide kills a wide variety of broadleaf weeds without harming existing ornamental plants or grasses. Effective against dandelion, thistles, ragweed, clover, burdock, sumac, honeysuckle, poison ivy and poison oak. Choose from foaming aerosol or concentrated liquid.

The foaming aerosol spray lets you accurately apply the herbicide only onto weeds without harming desired plants and grasses. The foam also shows coverage, reducing over-application. The concentrated liquid is a cost-effective answer for large coverage areas. Apply directly to weeds with a sprayer (see our selection on pages 1131-1132). Dilution rate: 1 oz of product to 96 oz of water. We recommend using a surfactant (listed below) for best performance.

Shipping: Quantities of 7+ of the 5-gallon size ship motor freight.
