Solo® Heavy-Duty Industrial Sprayers

BEST! SELLER!

14234

- Extra-large pump is up to 50% more efficient than competitive models
- Viton® seals and O-rings resist harsh chemicals
- Automatic pressure relief valve and external manual valve

These heavy-duty industrial sprayers feature an extra-large piston pump that pressurizes the tank with 50% fewer strokes than competitive models. The large 4 1/2" opening makes tank filling and cleaning easy. Viton seals and O-rings resist the harmful effects of harsh chemicals.

Sprayer features both an external manual pressure valve plus an automatic valve that releases excess pressure above 45 psi. The HDPE tank stands up to the toughest jobs. The 28" unbreakable wand has a professional shut-off valve and a no-drip check valve to eliminate nozzle drips, reducing chemical waste. A brass flat fan nozzle is installed for precise application around perimeters.

Includes: 2 1/4-gallon or 3-gallon HDPE tank, 28" wand with installed brass fan nozzle and extra adjustable nozzle, and 48" nylon-reinforced hose.

Solo® Backpack Sprayers

- Triple filtration system protects pump from small abrasive particles
- Viton® seals and O-rings are chemically resistant for long life and durability
- Built-in pressure regulator with 15, 30, 45 and 60 psi settings

These rugged backpack sprayers have a high-density polyethylene tank and chemically-resistant internal Viton seals that withstand harsh chemicals. The tank features a large 4.25" opening for quick, easy fill-ups. Deluxe padded shoulder straps and waist belt offer comfort, while pull tabs make adjustments quick and easy. The built-in pressure regulator features four settings: 15, 30, 45 and 60 psi. No-drip check valve eliminates nozzle drips after pressure is released.

All units feature a triple filtration system: filter basket, inlet filter and nozzle filter. This triple protection prevents particles from reaching the pump, extending pump life. A 28" unbreakable wand prevents damage common with brass and brittle plastic wands. Four nozzles are included for multiple spraying applications: **adjustable brass nozzle** for spraying a stream to a mist; **flat fan nozzle** for area and row application; **hollow cone nozzle** for shrubs and bushes; and **jet stream nozzle** for additional reach. The 332043 also includes a **plastic adjustable nozzle** for bleach solutions.

Choose from models with diaphragm pumps or piston pumps. Piston pumps produce up to 90 psi with optional plug attachment; use them for the widest pressure range. Diaphragm pumps can pass small abrasive particles without damage to pump, making them ideal for handling chemicals in wettable powder form, as well as liquid formulations.

Both include: HDPE tank, pressure regulator, 28" unbreakable wand, professional shut-off valve with lock on/off features, and an extra-large carry handle with wand retainers.

Deluxe sprayers available

Upgrade to these deluxe models for the most demanding professional. Deluxe models feature everything listed above, plus a high-quality adjustable brass nozzle, a pressure gauge for better control of spray pressure, and a foldaway handle with wand retainers for easy storage.

All sprayers include: 1-year warranty.

Solo® Rollabout Sprayers

- Save your back — sprayer rolls right up to your work area
- Viton® seals withstand harsh chemicals
- 72" hose lets you park sprayer in one place and spray remotely

Never lift a heavy sprayer again! Just roll the Solo Rollabout sprayer directly to your work area. Its heavy-duty wheeled caddy handles rough terrain with ease. The larger tank and caddy profile add height, which is a back saver when pumping and carting. The oversized pump handle doubles as a pull handle. Extra long 72" hose makes it convenient to park the sprayer and go about remote spraying tasks.

The Rollabout sprayer features an efficient piston pump that pressurizes with about half the amount of pumping required by competitive brands. The built-in valve also lets you inflate with an air compressor. Large 4 1/2" tank opening for easy filling and cleaning. HDPE tank with UV inhibitors is long lasting and resists corrosion. Lightweight, unbreakable wand and commercial shut-off valve with lock-on/lock-off feature minimize fatigue. Includes four-nozzle assortment for multiple spraying tasks. For safety, a pressure relief valve releases excess pressure.

Includes: 3-gallon HDPE tank with wheeled caddy, 21" unbreakable wand, automatic pressure relief valve, 72" hose and flat spray, hollow cone, jet stream and brass adjustable nozzles. 5-year warranty.
