

Choosing your Storage Cabinet

First determine the quantity and class of chemicals you have. Refer to Safety Data Sheets for information on the proper handling and storage of flammable and corrosive materials. Also be sure to check all local, state and federal regulations for flammable, combustible and acid/corrosive storage prior to selecting a cabinet.

operator notes

SciMatCo Bench Cabinets

- Conveniently sized—safely store corrosives or flammables at your work area
- Flammable cabinet meets all applicable OSHA and NFPA Code 30 standards

Constructed of 1" high-density plywood, these cabinets will not rust and are the perfect size for safely storing small amounts of flammables or corrosive chemicals on your benchtop. Cabinet floors feature a 2" liquid-tight trough for containment of spills. Flammable cabinet meets all applicable OSHA and NFPA Code 30 standards for the storage of flammable liquids. Flammable cabinet includes one fully adjustable shelf. Exterior dimensions are 16³/₄"W x 21¹/₄"H x 15³/₄"D.

Note: Flammable cabinet with self-closing door (stock # 75113) meets Unified Fire Code (UFC 79.202).

Kidde Smoke Alarms and Carbon Monoxide Alarms

Kidde alarms provide safety and convenience. Their sealed lithium battery and sensors last for 10 years—no worries about changing batteries or short-term sensors. Units feature 85-dB alarm, test/reset button and end-of-life alerts. Choose from two models.

Smoke alarms offer Smart Hush™ feature to quickly silence nuisance alarms, and an LED power indicator. Base plate is 5⁵/₈"Dia. **Carbon monoxide alarms** feature peak level memory that notifies you via a flashing LED light when a CO event has been detected in the last 14 days. Other LED lights indicate power, alarm status and error conditions. Units measure 4¹/₂"W x 2³/₄"H x 1¹/₂"D.

Includes: 10-year warranty.
