

Service Box Cover Wrenches

- Fits AWWA pentagon bolts

Our dual-socket service box wrenches fit both AWWA No. 1 and AWWA No. 2 pentagon head bolts, which measure 27/32" and 11/32" respectively point to flat. Both wrenches also incorporate a general purpose chisel point for operating tee head valves adjacent to meters. One model is available with a 5/8" slot through the 11/32" pentagon socket. Steel construction.

Pentagon Hand Key Wrenches

- Three different sockets offer maximum versatility

This carbon steel hand key wrench features three pentagon sockets: one for standard pentagon heads and two which fit the 11/16" pentagon head used on Mueller meter boxes. The standard socket also features a slot to operate T-heads on curb and meter stops. One of the Mueller sockets features an external lug nut which engages the lid recess, while the other has a head-retention cavity that retains the pentagon head during removal. Use the tapered blade end for prying or chiseling.

Service Box Combo Keys

- Pentagon key, rod key, pick & chisel

Our unique combination wrench has an AWWA No. 1 (27/32" flat to point) pentagon socket with 5/8" slot to enable the wrench to function as a rod key after the lid is removed. The 14" handle has a pick point on one end and a chisel point on the other for removing debris and for prying. Strong all-steel construction for years of service.
