

Sewer Spoons

- Heat-treated alloy steel blade with hardwood handles

Ideal for cleaning out hard-to-reach areas. Western pattern has acutely bent flat bottom with edges turned up.

Shipping: 10' and 12' models ship by truck.

8' Spoon	26174	\$
10' Spoon	26176	
12' Spoon	26178	

Sewer Spoons with 2-Piece Handle

- Break down easily to fit in the back of your truck

Spoon handles are coupled together when ready for use. Couplings are similar to those on two-piece boat oars, which take a lot more side thrust than you will apply working a spoon. Very strong.

Shipping: Ships UPS.

Pipe Cleaning Pigs

- Remove heavy deposits in water piping systems that can be pressurized

Flexible foam pigs have an urethane elastomer coating, causing a scraping action when forced through piping. Models shown here work with ductile iron, cast iron and PVC pipe. Pig length is approximately 1½ times the diameter.

These pigs feature medium density foam (approximately 5- to 8-lb density) and a tough coating that yields a strong resistance to wear yet remains flexible. All four styles may be used in pipelines with minor cross sectional diameter reductions or restrictions.

Note: Flexible foam poly pigs are available in larger sizes and with different coatings and hardnesses. They are also available for other applications (new construction clean-up, rehabilitation, routine maintenance) and for other types of pipe (HDPE, asbestos-cement, pre-stressed concrete pipe, mortar and/or epoxy-lined pipe, etc.). Contact USABlueBook for information.

Steel Manhole Cover 89095

Aluminum Manhole Cover 30297

Safety Roller Manhole Covers

- Grill mesh lets you see into manhole while keeping objects from falling in
- Choose from steel or aluminum construction
- Fits manholes up to 26"

Keep your workers safe and protect open manholes with these unique safety covers. The mesh grill provides visibility into the manhole while also creating a safe cover to protect against accidental falls. Choose from 38-lb steel covers in safety yellow or 11-lb aluminum covers in safety red. Both offer excellent visibility and long wear.

Covers feature a 20" inner ring with adjustable bolts, allowing a tight fit to manholes up to 26" with no slippage. Outer ring measures 28". The 5" nylon roller ensures easy maneuverability.

Drain Flushers

- ¾" GHT swivel inlet

Use these flushers as miniature hydraulic flushing plugs. They expand and seal with water pressure—a small slit in the end allows water to flow through and create pressure against the restriction in the pipe.
