

## Big Bubba® Non-Metallic Filter Housings & Cartridges

- Non-metallic construction will not rust or corrode
- Easy-open swing-bolt lid
- Pressure rating nearly equal to stainless steel!

With a pressure rating nearly equal to stainless steel, Big Bubba filter housings feature economical glass-reinforced polypropylene construction that will not dent, rust, or corrode. Convenient single-filter cartridge and swing-bolt lid closure provide quick, hassle-free cartridge service. The lid includes a pressure-relief button, pressure gauge, EPDM lid gasket and 304 stainless steel swing bolts.

Dual 2" slip fitting outlets (one active, one plugged) provide installation flexibility. The integral base allows you to bolt the housing to the floor. Includes drains for both clean and dirty fluids.

Cartridges twist-lock into the housing for secure, bypass-free operation. Choose from pleated or depth cartridges to fit your application. Both designs are sealed on one end and open on the other, with double EPDM O-rings on the open end.

**Pleated cartridges** are best for sediment and hard solids removal and applications where high efficiency is required. Cartridges with a micron size of 5 or larger may be cleaned and reused a number of times. Pressure drop is lower compared to depth cartridges, allowing for higher flow rates.

**Depth cartridges** excel at removing gelatinous substances. They are more economically priced than pleated cartridges, but they cannot be cleaned or reused. Depth cartridges are a good choice if you do not plan on cleaning the cartridge.

**Shipping:** Additional shipping fees apply to housing.

Series Configuration

Parallel Configuration

*You can set multiple housings in parallel or series configuration*

Order housing and cartridges separately.

Pleated Cartridge

Depth Cartridge

Lid features a pressure-relief button, pressure gauge, EPDM lid gasket and 304 SS swing bolts.

<b>Max flow rate:</b>	150 gpm
