## Harmsco® Filter Cartridges

- Save time and money—longer filter runs mean fewer change-outs
- High-quality filters offer increased contaminant removal

### A Premium Polyester Series Cartridges

Filter cartridges are NSF 61 certified (excluding high-temp filters). They're made of pleated Polyester-Plus™ filter media, which provides the industry's largest available surface area. Max temp: 140°F (standard), 200°F (high-temp). 2 3/4" OD.

### B Poly-Pleat™ Hurricane® Polyester Cartridges

Absolute-rated one-micron filter media removes *Cryptosporidium*, *Giardia* cysts, sediment, silt and turbidity. Large surface area increases filter life and particle removal. Use with Hurricane housings. NSF 61 certified. Max temp: 140°F; 7 3/4" OD.

## Watts® Pleated Sediment Cartridges

- Cleanable and reusable
- More surface area than string round cartridges

These cartridges are excellent for removing suspended solids. The pleated design allows greater flow rates and holds more solids, resulting in less maintenance. All cartridges except 0.35- and 1-micron are cleanable and reusable.

## Ultraleat® High-Flow Filter Cartridges

- Cost-effective and long-lasting

These coreless cartridges feature a unique crescent-shaped pleat geometry that provides high flow rates in a smaller housing. A proprietary helical external wrap holds pleats in place to create uniform flow across the entire surface of the filter media, ensuring consistent particle removal and a long service life. An inside-to-outside flow configuration traps particles and protects filtrate from recontamination.
