## Pall Water PolyWeld® Filter Bags

- Welded-seam design

These polypropylene filter bags withstand high solids loading while reducing waste volume and bag changes. PolyWeld seams mean there are no needle holes, eliminating the possibility of unfiltered liquid bypass. A polypropylene PolyLoc® ring on the bag creates a hermetic seal.

## Pall Water Nylon Mesh Filter Bags

- Fits standard size filter bag housings

These mesh filter bags with polypropylene PolyLoc® rings fit standard-size filter bag housings. Woven nylon monofilament nylon construction delivers excellent strength, flexibility and abrasion resistance. Bags are well suited for removing particulates from alkali liquids. More variations are available; visit our website or contact us for assistance.

## Pall Water MAX PONG Polypropylene Felt Filter Bags

- High dirt-holding capacity with low pressure drop
- Removes trace oil

These heavy-duty extended-life filter bags are a highly efficient choice for removing oil and filtering a wide range of particle sizes. Bags feature a seamless pure polypropylene microfiber-graded cartridge insert that's free of sizing, bonding, adhesive, resin, lubricant, silicone or antistatic chemicals. The welded-seam felt cover and PolyLoc® ring eliminate unfiltered bypass—great for continuous flow applications.

## Pall Water BOS Filter Bags

- Absolute rated
- Seamless construction

A microfiber-graded pore design makes these bags absolute rated for consistent quality and the highest efficiency. Thermally bonded polypropylene microfibers offer high tensile strength plus superior resistance to channeling, unloading, bypass and other forms of traditional leakage. Seamless construction means there's no sizing, bonding, adhesive resin or silicone—ideal for high-purity applications.
