

Meter Flange Packs and Kits

• Buy only what you need—available with and without flanges

Here's everything you need to plumb 1½" and larger flanged water meters. Choose from flange packs or kits.

Packs include: hardware (nuts and bolts) and a pair of drop-in style gaskets. **Kits include:** all of the same plus a pair of flanges. Flange interior is NPT(F) threaded so you can screw it onto the water line. May be used with S x MIP adapter if using PVC pipe.

Meter Flange Packs (No Flanges Included; SS Hardware)

METER SIZE	FLANGE SHAPE	# OF BOLTS	STOCK #	EACH
1½"	Oval	2	62353	\$
2"	Oval	2	62354	

Meter Flange Kits (with Flanges)

Meter Valves with Telescoping Flanges

- Retractable flange allows ¼" spacing in meter installations
- PTFE-coated brass ball with EPDM port seals
- Rated for 300 psig water pressure

These innovative, robust meter valves make meter installation and replacement easier than ever! They feature a patent-pending telescoping flange that allows for ¼" of room on demand. An attached flip-down spacer ensures full extension of the flange. Oval flange face fits both 1½" and 2" water meters.

Choose from 90° angle or straight styles. Drop-in flange gaskets not included; order separately below.

Patent-pending telescoping flange allows for ¼" of room on demand.

Water Meter Grounding Jumper Kits

- Prevent electrical shocks in plumbing systems
- Protect personnel, residents and equipment

Reduce the risk of electrical shock! Install these grounding kits on water meters that are attached to electrically grounded metal pipes. A properly installed jumper wire keeps plumbers and residents safe by allowing the electrical panel to remain grounded at all times, even while pipe sections are removed. Local codes often require grounding straps. Fits ½", ¾" and 1" pipes.

Includes: two clamps, four clamp screws, two set screws and 24" of bare 8-gauge copper wire.
