Time to Flush Your Hydrants? See page 528 for **Dechlorination Diffusers.**

2 1/2" NST Hydrant Nozzle Savers

- Eliminates overhung load on hydrant nozzle

When you install a hydrant meter, backflow preventer or both as an assembly onto a hydrant nozzle, the stress on the nozzle can be considerable, especially if the device is subjected to an impact from the top or side. Our "S"-shaped hydrant nozzle saver has a 30° offset configuration to provide vertical adjustment up to 15". Simply rotate the nozzle saver to lower the weight to the ground or intermediate support stand*. Made of 2 1/2" Sch 40 aluminum pipe with 2 1/2" NST brass couplings. Overall length is 54". Weighs 15 lbs. Ships UPS.

DESCRIPTION	STOCK #	EACH
Hydrant Nozzle Saver	22525	\$

* Remember that RPZ backflow preventers should be mounted at least 12" off of the ground.

Hydrant Meter Lock

Gate Valve Lock

Pipeline Products Hydrant Meter Locks

- Simple, affordable way to secure your hydrant meter
- Secure with a standard padlock or barrel lock

Keep your hydrant meters safe from tampering and theft with Pipeline Products hydrant meter locks. These affordable yet effective locks are secured using a standard padlock or barrel lock. Meter locks feature durable, powder-coated aluminum construction with a stainless steel hinge that won't rust. Gate valve locks are also available for use with any 2" gate valve.
