

Autoclavable Benchtop Biohazard Bags

- Sterilize used petri dishes from coliform testing prior to disposal

Economical and convenient, these biohazard bags are ideal for collecting and sterilizing used petri dishes, membrane filters, pipette tips and other laboratory implements before disposal. Bags are made of high-density polyethylene, and feature a biohazard symbol along with an indicator patch that darkens when steam sterilized. Max temperature is 135°C for all bags except stock # 41074, which has a max temperature of 121°C.

Optional bag holder makes collection on desks, benchtops and in fume hoods easy. Order separately below.

Clavies® Clear Autoclave Bags

- Safe, effective biohazard disposal

Clear bags are not as ominous as red biohazard bags and are less likely to cause unnecessary alarm. Fill bags with used petri dishes, membrane filters, pipettes, etc, then sterilize and discard. Polypropylene bags handle steam autoclaves up to 121°C (250°F). Bags come 100 per box.

Hi, I'm Al M.
"We have over 57,000 items available for water and wastewater treatment."

Autoclave Gloves

- Heat resistant up to 232°C (450°F)

Protect your hands when handling objects out of the autoclave or oven. Gloves are made of soft all-cotton terry cloth and are available in 13" or 18½" lengths. Bright orange color offers high visibility. Machine wash, tumble dry. Sold in pairs.

LENGTH	STOCK #	PAIR
13"	31528	\$
18½"	31529	

Hot Hand® Protectors

- Superior protection for handling hot or cold products
- Multiple concave-tipped studs give you a non-slip grip

Hot Hand protectors offer superior protection for handling hot or cold items. They withstand temperatures up to 260°C (500°F), and remain flexible in temperatures down to -57°C (-70°F).

Multiple concave-tipped studs give you a non-slip grip, and strong silicone rubber construction resists tearing. Thumb and fingers fit into each end pocket. Convenient hole for hanging.

Multipurpose Trays

- Transport samples and equipment easily
- Same-size trays are nestable

Use these rugged 8.5-L polypropylene trays to transport or store samples and equipment, or place them in your sink to soak and clean glassware. Choose from trays with or without handles. Same-size trays nest within each other for easy storage. Autoclavable at 121°C (250°F).
