**Formula 52 Odor-Eliminating Enzymes**

- Don't mask lift station odors—eliminate them!

USA BlueBook Formula 52 is a great multiple-action product. We sent a sample to one of our customers at a brewery to try on their toughest odor-producing system—brewery waste is one of the most offensive odors around. After one application, they noticed an immediate elimination of odors. When the waste tank was pumped out, there was also no noticeable odor. This product is used extensively in the agriculture industry to eliminate odors in pig, horse and poultry barns.

Formula 52 is safer than lime or chemicals and easy to apply—use a tank sprayer (stock # 14235) to spray directly on sludge or odorous surfaces. It can also be pumped or poured into tanks, wetwells, and sludge processes to immediately eliminate the strongest of odors.

**Shipping:** The 30- and 55-gallon drums and 7+ of the 5-gallon pails ship motor freight.

SIZE/PACKAGING	STOCK #	EACH
1-Gallon Bottle	64702	\$
5-Gallon Pail	64703	
30-Gallon Drum	64704	
55-Gallon Drum	64705	
Tank Sprayer with Wand, 3-Gallon	14235	

**Dosing:** We recommend an initial 9:1 dilution, adjusting more or less as needed. This concentrated formula can be diluted as much as 20:1 or as little as 4:1, depending on the severity of the odors.

**Odor Neutralizing Powder**

- Add directly to the source of the odor
- Available in water-soluble pouches

This powder can be added directly to the source of the odor. The micro-sponge time-release synthetic earth powder stays suspended in water and can be added to biosolids feed hose as it pumps into the tank truck. It can also be sprinkled in garbage containers, down compactor chutes or put in perforated pails for room odor control.

Water-soluble pouches can be added directly to clarifiers, digesters, ponds and lagoons. To calculate how much powder is needed, use this formula: weight of the malodor source (in lbs) x 0.0002 = lbs of powder needed.

**USA BlueBook Sludge De-Odor Super Concentrate Liquid**

- Use to control odors in or around sludge

Our powerful liquid odor suppressants are specially formulated for controlling odors in or around sludge handling tanks, drying beds and scum pits. Apply by pouring directly into your process feed pump, by drip or by spraying it over your process.

This product can be diluted to 1:3, giving you three times the supply. Even at this diluted rate, one gallon will treat 5000 gallons of sludge. One quart will make about 1.2 gallons, handling 6500 gallons of sludge **Shipping:** The 55-gallon sizes ship motor freight.
