

Hach Arsenic Test Kits

- Safe, low-cost method to measure arsenic in water
- Complies with the EPA arsenic rule; measures below 10 ppb of arsenic

Hach's economical arsenic test kits let you easily determine arsenic concentrations in the lab or field. Kits use powdered reagents and arsenic test strips to minimize your exposure to arsine gas. Test results are generated in 30 minutes. Choose from two kits.

Low-range test kit is best for samples containing sulfide or arsenic-iron particles. It has a high recovery of arsenic (100%) and can measure organic arsenic with some additional steps.

High-range test kit takes fewer steps and is more economical. While this test recovers 90% of inorganic arsenic, it does not have an option to measure organic arsenic.

Includes: reagents for 100 tests, reaction vessel, test strips, comparison chart and rugged carrying case.

Note: Contains mercury; dispose of according to local, state and federal regulations.

	Low range (77406)	High range (77418)
Range:	0 to 500 ppb	0 to 500 ppb; 0 to 4000 ppb
Increments:	0, 10, 30, 50, 70, 300, 500 ppb	0, 10, 25, 50, 100, 250, 500 ppb; 0, 35, 75, 175, 1500, 4000 ppb

DESCRIPTION	# TESTS	STOCK #	EACH	QTY 10+
Low-Range Arsenic Test Kit	100	77406	\$	\$
High-Range (EZ) Arsenic Test Kit	100	77418		

Easily test lead levels in water and manage the results with **eXact® LEADQuick® with Bluetooth® Water Test Kits.**

See page 757 for complete information.

Industrial Test Systems Arsenic Quick™ II Test Kits

- Results in less than 15 minutes
- Detects arsenic levels less than 1 ppb

These arsenic test kits give accurate results without sacrificing cost, safety or time. User-friendly test procedures produce reliable results in less than 15 minutes. Two different kits are available—choose the low-range kit for greater resolution under 2 ppb.

	Standard (41247)	Low range (41249)
Range:	<1 to 160 ppb	<0.5 to 50 ppb
Increments:	<1, 2, 3, 4, 5, 6, 7, 8, 10, 13, 20, 25, 30, 40, >50, >80, >120, >160 ppb	<0.5, 1, 1.5, 2, 3, 4, 5, 6, 7, 8, 12, >20, >30, >50 ppb

DESCRIPTION	# TESTS	STOCK #	EACH

Arsenic Test Kit, Low Range	50	41249	

Hach Chloride Test Strips/Titrators

- Easy, fast and reliable

Hach test strips are easy to use and easy to read. Place the strip into your test solution and read the numerical result on the strip. Use the accompanying calibration table to determine the chloride ion concentration. Bottle includes 40 strips.

	Low range (41276)	High range (41277)
Range:	30 to 600 mg/L	300 to 6000 mg/L
Increments:	variable, 10 to 20	variable, 100 to 200

DESCRIPTION	# TESTS	STOCK #	EACH
