Primary Chlorine Standard Kits

- Complies with US EPA Method 334.0
- Fast and easy—no need for complicated dilutions

Making a primary chlorine standard has never been easier. This kit lets you prepare a 1.5-mg/L NIST-traceable chlorine standard in minutes without complicated dilutions. Use this standard to validate the calibration of both lab and in-line chlorine measuring equipment.

Includes: zero chlorine demand water, chlorine ampule, ampule breaker and instructions.

DPD Reagent Strips™

- Safe and convenient reagent delivery system
- No tablets to crush, powders to spill or glass ampules to break

Reagent strips for free and total chlorine offer a safe and convenient way to deliver DPD. There are no tablets to crush, powders to spill, or glass ampules to break. Reagent is contained on the strip's pad. Simply dip the strip into your 10-mL sample for 20 seconds with a back and forth motion, remove strip, discard it and read with your colorimeter. Each strip is individually wrapped. Supplied in packs of 100.

MFR #	TYPE (TEST)	SAMPLE	# TESTS	STOCK #	PACK
484101	DPD 1 (Free)	10 mL	100	34418	\$
484104	DPD 4 (Total)	10 mL	100	34419

LaMotte DPD Liquid

- Convenient—no waiting for tablets or powder to dissolve

DPD liquid is a great alternative to powders and tablets. Color change is fast and stable. To test for free chlorine, use both DPD 1A and DPD 1B. To test for total chlorine, add DPD 3 to your reacted free chlorine sample. 30-mL (1-oz) bottles contain enough reagent for up to 144 tests. 60-mL (2-oz) bottles contain enough reagent for up to 288 tests.

MFR #	TYPE (TEST)	SAMPLE	# TESTS	STOCK #	EACH
P-6740-G	DPD 1A (Free)	5 or 10 mL	144	27850	\$
P-6740-H	DPD 1A (Free)	5 or 10 mL	288	27852	
P-6741-G	DPD 1B (Free)	5 or 10 mL	144	27854	
P-6741-H	DPD 1B (Free)	5 or 10 mL	288	27856	
P-6743-G	DPD 3 (Total)*	5 or 10 mL	144	27858	
P-6743-H	DPD 3 (Total)*	5 or 10 mL	288	27860	

*DPD 3 liquid must be used in conjunction with DPD 1.
