

USABlueBook BRAND PRODUCTS

**Economical, high-quality DPD dispensing—
use with any test kits & colorimeters**

Precise dosing
every time!

USABlueBook DPD Dispensers

- Two formulations for colorimeters using powder or tablets
- Improved design prevents clogging

Eliminate the hassles of crushing tablets or wrestling with foil powder pillows! Simply invert the USABlueBook DPD dispenser over the sample tube, press the button, and watch the dispenser dose the correct amount of reagent.

Select the formulation for your colorimeter. Hach, HF Scientific® and Hanna® colorimeters use one type of formulation; USABlueBook, LaMotte®, Thermo Orion®, Palintest® and Lovibond® use another type of formulation.

Select from the two convenient sizes. For low-volume users, choose the 100-test size; for high-volume users, choose the 1000-test size (5 individually sealed, 200-test dispensers). Each dispenser is individually packaged in a moisture-resistant, resealable foil bag. Once opened, store in a cool, dry place.

TYPE (TEST)	SAMPLE	# TESTS	STOCK #	EACH
FORMULATION FOR USE WITH HACH, HF, HANNA				
DPD 1 (Free)	5 mL	100	34441	\$

Reagents available for USABlueBook, Orion, LaMotte, Hach and others!

DPD reagents are available in several forms (powders, tablets, and liquids) from several manufacturers. We suggest that you use the reagents that came with your colorimeter. However, if you prefer a different type or brand of reagent, most colorimeters can be easily recalibrated for use with new reagents. Simply follow the recalibration instructions in the operating manual for your colorimeter.

Hach SwifTest™ DPD Dispensers

- EPA accepted for reporting drinking water and wastewater analysis
- Makes high volume chlorine testing easy!

Hach's SwifTest dispenser is easy to use— simply squeeze the trigger to dispense DPD chlorine reagents. There's no need to hassle with powder pillows. Ideal for high-volume chlorine testing. Reagent refills are available to lower the overall cost per test.

Includes: SwifTest dispenser and reagent.
