

MilliporeSigma MColorpHast™ pH Test Strips

- Bleed-free test strips prevent sample contamination
- Easy-to-read color chart
- Choose from strips for standard or turbid water applications

74031

Use these pH test strips for environmental analysis and industrial process control. Their unique dyes are covalently bonded to the reagent paper, preventing sample contamination caused by bleeding. Strips for turbid water applications feature special color-change enhancers.

To use, just dip the strip into your sample, shake off the excess water and compare color change to the easy-to-read color chart on the box. Large color stripes for each increment ensure accurate assessment.

Multiparameter Test Strips

- Use one strip to check multiple parameters
- Choose from 3- or 5-parameter test strips

Ideal for process checks and testing fresh water sources. Strips test alkalinity as defined by calcium hardness, and total hardness as by both calcium and magnesium carbonate concentration. Simply swirl the strip in your sample three times, and place or hold the strip on a level surface. After one minute, compare results on the strip to the color chart on the bottle.

3-Parameter Test Strips

5-Parameter Test Strips

	Range	Increments
Three-parameter strips		
pH:	6.4 to 8.4 pH	6.4, 6.8, 7.2, 7.6, 8.0, 8.4
Total alkalinity:	0 to 360 mg/L	0, 50, 100, 180, 270, 360
Total hardness:	0 to 500 mg/L	0, 50, 125, 250, 500
Five-parameter strips		
pH:	6.4 to 8.4 pH	6.4, 6.8, 7.2, 7.6, 8.0, 8.4
Total alkalinity:	0 to 20 KH*	0, 3, 6, 10, 15, 20
Total hardness:	0 to 28 GH*	0, 3, 7, 14, 28
Nitrate:	0 to 500 mg/L	0, 10, 25, 50, 100, 250, 500
Nitrite:	0 to 25 mg/L	0, 0.5, 1.0, 5.0, 10, 25

* Multiply result by 17.8 to obtain mg/L value.

USA BlueBook BRAND PRODUCTS

YOUR BEST VALUE!

1-Pad pH Test Strips

3-Pad pH Test Strips

USA BlueBook pH Test Strips

- Ideal for quick checks and screenings
- Non-bleed system prevents sample contamination

Use these pH strips to quickly determine your measurement starting point. Simply dip the padded end into your sample, shake off any excess liquid, and match the color to the chart on the packaging before the strip dries. Choose from economical single-pad strips or three-pad strips for easier determination of color change. Three-pad strips come in a convenient package with sliding lid for easy dispensing.
