

LAB TESTING Ion Selective Electrodes

Hach IntelliCAL™ Ion Selective Electrodes

- Move between meters without recalibrating
- Digital solid-state technology for increase sensitivity and long life

Digital IntelliCAL ISE probes are combination ISEs with an integrated reference for ease of use. These double-junction probes store their own testing parameter, calibration history and settings. This lets you move the probe between meters without recalibrating, minimizing errors and setup time.

These probes track their own performance level and alert you when it's time to recalibrate. Each probe even stores its own serial number for complete traceability, chain of custody and regulatory reporting. Includes 1-m cable.

Note: Designed for use with Hach HQ (4000 series) and HQd meters only. See pages 770, 784 and 855.

DESCRIPTION	ISE ELECTRODES		ISA SOLUTION (POWDER PILLOWS, PACK OF 100)		CALIBRATION SOLN (1 mg/L, 500 mL)		CALIBRATION SOLN (10 mg/L, 500 mL)		CALIBRATION SOLN (100 mg/L, 500 mL)		CALIBRATION SOLN (1000 mg/L, 500 mL)	
	STOCK #	EACH	STOCK #	EACH	STOCK #	EACH	STOCK #	EACH	STOCK #	EACH	STOCK #	EACH

Hach sensION+™ Ion Selective Electrodes

- The latest solid-state technology for increased sensitivity and long life
- Maintenance free — no electrolyte required

Hach sensION+ ISE electrodes have no fill solution or spare membrane replacements (except sodium and ammonia models). Use with any ISE meter that accepts a BNC connector.
