

### Fisher M-66 Metal Detectors

- Detects all metals
- 8" search coil
- Manual ground adjust

This simple, no-frills metal detector locates all types of underground metal, including steel, aluminum, brass and lead. It penetrates through soil, cement and asphalt.

The M-66's simplified design with only two knobs helps you attain maximum performance. The sensitivity knob eliminates signals from small items that may be in the ground. Adjust the manual 10-turn ground compensation knob for varied soil conditions.

Fisher's M-66 has the same mechanical design as the M-97 (shown at right), with a double locking shaft adjustable to 50". Operates on two 9V batteries (included). 2-year manufacturer's warranty.

**Note:** The M-66 is only available with a non-interchangeable 8" coil. Detection depth capabilities depend on size of the object and soil conditions.

### Fisher M-97 Valve, Pedestal and Box Locators

- High sensitivity for maximum penetration through soil, asphalt or concrete
- Compact size for convenient storage and transportation
- 2-year warranty

This advanced yet easy-to-use locator is specially designed for finding buried or paved-over valves, boxes, manhole covers or other concealed metallic objects. It also locates targets made of aluminum, brass and lead.

Push-button tuning quickly and easily maintains optimum sensitivity for pin-pointing of buried metallic objects. Also features auto-tune circuitry and ground effect rejection VLF (very low frequency) control, which eliminates annoying false signals from wet foliage, pavement or mineralized ground.

The M-97 features an adjustable shaft with double-locking stem. The waterproof search coil holds up extremely well when locating in adverse conditions. The unit folds up for convenient transportation and storage. Just compact the lower stem, twist the search coil 90°, and fold the search coil flat. The M-97 then fits easily into the optional carrying case.

Choose from units with either an 8" or 11" search coil.

<b>Sensitivity adjustment range:</b>	12:1
<b>Battery type:</b>	two 9V batteries (included)
<b>Battery life:</b>	25 to 35 hours
<b>Weight:</b>	3.3 lbs (8" coil); 3.9 lbs (11" coil)
<b>Length:</b>	adjustable, 38 to 50"

### Goldak 7200 Metal Locators

- Locate and pinpoint buried valve and curb boxes, water meters and manhole covers
- Find any kind of metal—aluminum, brass, iron & steel
- 1-year warranty

Easy-to-use Goldak 7200 metal locators offer an advanced design that is fully automatic, durable, reliable and self-tuning. They feature a ferrous/non-ferrous indicator and separate locate/pinpoint modes. An easy-to-read LED display and a crisp audio signal guide you to locate and pinpoint the target.

Locators weigh only 5 lbs and feature an ergonomic design. For added convenience, they fold into a compact package that makes them simple to stow. Units operate on eight AA batteries (included).
