

Open- & Closed-Top Poly Drums

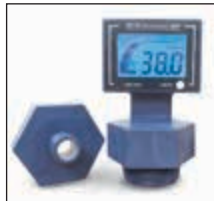

- Great for a wide variety of applications
- USDA and FDA approved

Rugged polyethylene drums are great for storing or mixing chemical solutions around the plant. USDA and FDA approved for direct food contact.

Choose from two different types. Use open top drums with removable lids for solid materials, or closed top drums for liquids. The closed top has 2" and 3/4" NPT bung openings. The open top has a gasket for the cover and is held secure with a locking slide lever. Corrosion resistant and approved for outdoor usage. Seamless, one-piece design.

Other sizes are available; contact USABlueBook for more information.

Shipping: Additional shipping fees apply. Select units ship motor freight.

Drierite® Vent Dryer Systems for Drums and Totes

- Keep harmful moisture out of your containers
- Prevent corrosion and biological growth

Keep harmful moisture from collecting inside your storage tanks and affecting polymer and other chemicals. Vent dryer systems use indicating Drierite desiccant to actively dry any displaced air entering the container. Desiccant turns from blue to pink when exhausted.

Vent dryer systems are available for drums or totes. A complete system includes an adapter and a cartridge. Dryer cartridges are available in prefilled disposable or refillable options (refillable option for drums only). Refillable option requires desiccant (stock # 87523, sold separately below).
