Magnetic Valve Box Lifters

- Lift heavy cast-iron utility covers without bending over
- Locking on/off handle for easy, safe cover removal

Save your back—stop bending over to lift and remove cast-iron utility and valve box covers! This lightweight deep-reach magnetic valve box lifter also reduces finger and toe injuries. It features a strong magnetic field that penetrates textured lid surfaces and lets you easily lift the casting out of the opening.

The lifter has an easy-to-use locking on/off handle for extra safety. Rated for small cast-iron covers up to 50 lbs. Measures 28.5"L and weighs just 5.5 lbs.

Retrieving Magnets

- Zinc-plated eyebolt for attaching rope
- Lifts up to 225 lbs
- Great low-cost option

These magnets are a great low-cost way to retrieve lost tools. They retrieve up to 225 lbs and cost half the price of conventional horseshoe magnets. Be prepared!

Bar Screen Rakes with Fiberglass Handles

- Fiberglass handles have lifetime warranty
- Detachable-handle models extend up to 15'; feature heavy-duty steel couplings for superior strength and rigidity

Our unique bar screen rake was designed specifically for WWTP operators. USABlueBook offers both an economical fixed-handle rake and the versatile detachable-handle rake. Both models feature an all-steel four-tine 6 1/4"-wide rake head with four 6" tines (1 5/8" space between tines).

The **fixed-handle rake** offers a 64" fixed handle. The **detachable-handle rake** is a three-part system. You must order one 3' head section (stock # 25519) and one 3' top section (stock # 25517). You may also order up to three 3' middle sections (stock # 25518) for a total length of up to 15'.

Fill it up, let it drain & then dispose!

PlantPRO™ DrainSack Wastewater Skimmings Disposal Systems

- Easy handling of skimmings in small systems

plantPRO

De-water wastewater skimmings on the spot! No more hauling to the drying beds or mixing with sawdust for landfill compliance. The PlantPRO DrainSack System reduces volume, weight, odor, handling and disposal costs. Simply:

- (1) Load a DrainSack into the drip bucket, overlapping the edge so the bottom of the bag is 1/2" above the bottom of the pail.
- (2) Lock it down with the threaded locking ring.
- (3) Fill it, let it drain and dispose of the DrainSack when sufficiently dry.

The buckets are standard 5-gallon pails, which have holes drilled in the bottom for drainage and the center of the lid cut out for open access. Purchase the predrilled pails separately. Bags sold in packs of 25.
