

Hach HQ Multiparameter Meter Kits with Rugged Probes

All rugged kits include: HQ2100 or 2200 meter (see contents on facing page), rugged probe(s) with 5-m cable, probe case, pack of 280 wipers, five cable markers, and three 90-mL containers.

Kits with pH probe also include: 60 Singlet™ buffer packs (one 20-pack each of pH 4.01, 7.0 and 10.01). **Kits with DO probe also include:** 250-mL Erlenmeyer flask.

Hach IntelliCAL™ Smart Probes

LBOD Probe 35684

- Choose from a huge variety of parameters and styles

Hach IntelliCAL smart probes store their own testing parameters, calibration history and settings. HQ meters recognize each probe so you can move probes between meters without recalibrating, minimizing errors and setup time. Proven technology delivers superior accuracy and response times—even with challenging samples or difficult operating environments.

Choose from rugged or standard probes **Rugged probes** feature an IP68 stainless steel body and polymer sensor shroud with a steel-sheathed cable; they are waterproof to 30 meters. **Standard pH probes** feature built-in ATC.

ORP probes have an epoxy body. **Conductivity probes** use a 4-pole graphite design. **LDO and LBOD probes** are immune to hydrogen sulfide and heavy metals interference and have no membranes to clean or replace—just replace the sensor cap about once a year.

Look for ammonia, ammonium, chloride, fluoride, nitrate and sodium IntelliCAL ISE electrodes on page 838.
